1962—Volume 109

Author and Subject Index

Journal of The Electrochemical Society

February 1963 in Two Parts—Part II

Author Index (Vol. 109, 1962)

Acello, S. J., *et al.* Electrode Mount for Electrochemical Studies of Stressed Metal Specimens, 1001

Adams, I., *et al.* Luminescence in the System Al_2O_3-AlN, 1050

Aiya, Yoshihiko, *et al.* Improved Electrolytic Processes for the Production of Iodic Acid, Periodic Acid, and Their Salts Using a Special Lead Dioxide Anode, 419

Albers, W. A., Jr., and Rickel, A. M. Investigation of Some Uncommon Surface Treatments on Germanium, 582

Albert, M. P., and Combs, J. F. Thickness Measurement of Epitaxial Films by the Infrared Interference Method, 709

Alexander, E., and Steinberger, I. T. Electroluminescence Emission Spectra of ZnS Single Crystals, 870

Allen, M. J. Continuous Flow Cell for Electrochemical Synthesis, 731

Allison, H. W., and Fuller, C. S. Polishing Etchant for III-V Semiconductors, 880

Alonso, F., *et al.* Tarnishing Reaction of Copper with Solutions of Thiourea and Derivatives. Study by Radiotracers, 368

Amick, J. A., *et al.* Stabilization of Germanium Surfaces by Ethylation, I. Chemical Treatment, 124; II. Chemical Analysis, 127; III. Electrical Measurements, 133

Andrew, K. F., and Gulbransen, E. A. Oxidation Studies on 304 Stainless Steel, 560

Angstadt, R. T., *et al.* Electrode Potentials and Thermal Decomposition of Alpha- and Beta-PbO_2, 177

Arizmendi, L., *et al.* Tarnishing Reaction of Copper with Solutions of Thiourea and Derivatives. Study by Radiotracers, 368

Armstrong, W. J. Diffusivity of Arsenic in Silicon, 1065

Atkinson, J. T. N., and Greenblatt, J. H. Behavior of the Metal-Oxide Interface During the Early Stages of the High-Temperature Corrosion of Aluminum, 771

AuCoin, T. R., *et al.* Luminescence in the System Al_2O_3-AlN, 1050

Aven, M., *et al.* Optical Measurements on ZnS:Cu Produced by Neutron Irradiation of ZnS, 1154

Awad, S. A. Electrochemical Evidence for Diatomicity of Tellurium, 865

Aylward, J. R., and Whitener, E. M. Dissolution of Zirconium in HCl-Methanol, 87

Bagrowski, J., and Lauriente, M. Electroless Ni-Co-P Films with Uniaxial Anisotropy, 987

Baird, D. H., and Palilla, F. C. Red-Emitting (Zn,Cd)(S,Se) Electroluminescent Phosphors, 1162

Baker, R. A. Conditions for the Formation of α or β Lead Dioxide During the Anodic Oxidation of Lead, 337

Bakish, R., *et al.* On the Fundamentals of Etching High-Purity Aluminum Foil for Capacitor Use, 791

Iron. *d.* 547
Silicon. 1206
Zircaloy. 92, 208, *d.* 1217
Oxide whiskers. Copper. 211, *d.* 1217
Oxygen. Cathodic reaction. 333
Copper cathode. 884
Layers. Platinum. 1135
Niobium. 1142
Platinum. 425

Perchloric acid. Double layer capacities of gold in. 243
Periodic acid. Production. 419
Phosphorus. Diffusion doping. 874
Diffusion in silicon. 392
Electrodeposits. 1040
Silicon solar cell. 313
Phosphors. Cathodoluminescence. 678
Copper-activated. 109
Electroluminescence. *d.* 540, 1162
Hydrogen fired. 872
Manganese-activated. Cadmium. 569
Fluoride. 18
Thallium-activated. 306
Tin-activated. 15
Zinc oxide. 502
Zinc sulfide. 103, 309, 688, 695, 1154
Photoconductors. Transient effects. 683
Photoluminescence. Effects in electroluminescence. *d.* 540
Photovoltage. Silicon-electrolyte. 1195
Plates. Storage battery. Crystallogenesis. 760
Platinum. Electrodes. 42, 425
Hydrogen reaction. 549
Methanol oxidation on. 622
Oxidation. 1099
Oxygen acid system. 858
Plutonium. Oxide films. 895
Polarization. Capacitance of electrical double layer. 168
Current in electrode. 638
Curves redox system. 327
Fuel cell. 753
Manganese dioxide electrode. 349
Mercaptoalkyl compounds. 518
Pulsed measuring system. *d.* 549
Sodium hydroxide and chloride. 81, *d.* 1214
Steel. *d.* 544, 795
Polishing. Jet electrolytic. 1167
Porosity. Gold plated copper. *d.* 545
Powders. Tungsten and molybdenum production. 713
Pulse measurement. Semiconductor-electrolyte space charge capacity. 534
Pyrimidine compounds. Electrochemical characteristics. 352

Quartz. Boats. Crystallinity of gallium arsenide. 642
Contamination of gallium arsenide. 700
Reaction of gallium 149

Radioactive tracer method. 260, *d.* 1218
Radioactivity. *ed.* 126C
Radioisotope. Zinc sulfide: copper. 1154
Radiotracer. Anodic oxidation. 999
Study of copper tarnishing reaction. 368
Raney catalysts for electrodes. 553
Rare earth tellurides. Chemical polishing. 750
Single crystal. 1110
Redox systems. Polarization curves. 327
Resistivity. Variations in germanium crystals. 947
Rhenium-tungsten-carbon interactions. *d.* 550
Rotating disk electrode. 849

Seeding. Antimony crystal rod. 738
Selenium. Vapor pressure. 595
Semiconductor. Alloying to III-V compounds. 270
Damaged layer. 743
Dice. Chemical etching. 269
Etchant. 880
Etches. 824
Germanium. 582
Junction delineation. 166
Pulse measurement, space charge capacity. 534
Surface, hysteresis. 608
X-ray diffraction microscopy. 27
Silicon. Aluminum fusion into. 229
Bicrystal growth. 1068
Compounds. Donor impurities. 138
Contamination gallium arsenide. 149
Crystal growth. 1171
Damage layer. 743
Deposition. 514
Diffused layers. 235
Diffusion. 1002, 1106
Arsenic. 1065
Phosphorus. 392
Pipes. 604
Electrolyte. Photovoltage. 1195
Epitaxial growth. 952, 957
Etching. 37
Films. 70, 643, 1055, 1206
Grooving method. 141
Jet electrolytic polishing. 1167
Junction delineation. 63
Oxidation. 73
Phosphorous diffused solar cell. 313
Physical and dielectric properties. 94
Single crystal. 27
Vapor phase doping. 267
Silicon dioxide. Capacitors. 1192
Silicon dioxide films. Gas permeation. 221
Silver. Chloride cells. Ionic transport entropy. 56
Effect on fused sodium chloride. 889
Electrode. Silver chloride. 745
Silver oxide. 1119
Oxide. 173
Sodium borohydride. Anodic fuel. 1104
Sodium chloride. Anode effect. 443
Effect on silver crystals. 889
Electrostatic field effect on surface tension. 852
Polarization. 81, *d.* 1214
Sodium hydroxide. Polarization. 81, *d.* 1214
Solar cells. Fabrication and characteristics. 313
Space charge capacity of semiconductor surface. Pulse measurement. 534
Stainless steel. Adsorbed anions. 716
Oxidation. 560
Polarization. *d.* 544
Stress corrosion cracking. 343, *d.* 1212
Steel. Cathodic overvoltage. 1013
Polarization and inhibition. 795
Ultra-high strength. Alloy plating. 490

Storage battery. Lead-acid. Crystallogenesis in forming plates. 760
Sulfur. Distribution in single crystals. 829
Sulfuric acid. Dissolution of brass. 1130
Sulfurization. Nickel. 273
Surface area. Influence on cathodic reduction of manganese dioxide. 1
Surface concentration. Indium in germanium. 114
Surface tension. Germanium effect on indium. 1199
